

See Starview machines being demonstrated at MD&M and Eastpack 2015.

Visit Starview June 9th through June 11th 2015
Jacob K. Javits Convention Center | New York, NY
Booth 1867

ERB/PH4-1418

MR/PH2-1824

Don't miss it! Starview will be participating for the first time at MD&M East. We will be demonstrating our *ERB/PH4-1418* four-station semi-automatic rotary medical device packaging machine with finished package unloader and our *MR/PH2-1824* large format two-station rotary medical device packaging machine.

These machines feature high pressure pneumatic sealing presses, medical device/clean room consistent designs and finishes. User friendly process controls for third party validation are accessed through a color touchscreen HMI. An Ethernet network connection to machine controls is standard with a Wi-Fi network connection optional. We will demonstrate Wi-Fi access using a tablet or smartphone.

Starview's *ERB/PH4-1418* and *MR/PH2-1824* will be running a PETG medical device tray from Universal Protective Packaging www.uppi.com and Tyvek lidding from Amcor Flexibles www.amcor.com. A flash drive with our Medical Device and Pharmaceutical Packaging machines will be sealed in the package.

Don't miss this opportunity to see Starview's Medical Device and Pharmaceutical Packaging machine in operation.

EastPack 2015

June 9th through June 11th 2015
Jacob K. Javits Convention Center | New York, NY

Starview's *NEW* FAB4-1216

At Rohrer Corporation's Booth 2939 **See Starview's *NEW* model FAB4-1216 in operation**

Starview is excited to announce the addition of a second machine size to our FAB4 Series blister packaging machines. The new FAB4-1216 has a larger 12" x 16" sealing area to complement the existing model FAB4-1012 machines. The FAB4 Series machines feature an electric drive for the blister feeder, card feeder and finished package unloader. A cam type rotary table indexer coupled to an AC frequency drive provide accurate table positioning. The sealing press is pneumatic.

The FAB4 Series machines are ideal for small OEM's who need to reduce labor costs to remain competitive or larger manufacturers needing a small footprint automatic blister packaging machine for a work cell production environment. These machines will produce standard face seal blister packages as well as mock-clamshell and full face blister packages.

Visit with Rohrer Corporation www.rohrer.com at EastPack to see the FAB4-1216 in operation.
