

STARVIEW™

ASP & ASP/IR SERIES AUTOMATIC SKIN PACKAGING MACHINES

ASP Series with automatic overhead out-feed (upper left) and ASP/IR Series with standard manual out-feed table (lower right).

- ★ Standard sizes 18 x 24" through 36" x 48" offered
- ★ Use for retail carded packaging or shipping containment
- ★ PLC machine control with touch screen operator interface panel
- ★ Moving template in-feed and manual out-feed tables standard
- ★ Impulse hot wire cut-off standard
- ★ Optional automatic out-feed available

Description

Starview's ASP & ASP/IR Series skin packaging machines are designed for low to medium volume applications. ASP machines incorporate a stationary heating system with instant on/off heaters. ASP/IR models incorporate an automatic retractable radiant heater panel system, controlled by percentage controllers for precise heat distribution. All ASP & ASP/IR skin packaging machines have PLC timer control for precision repeatability and an accurate turbine regulator. An automatic in-feed table with traveling template loader, out-feed table and impulse type hot wire cut-off are all standard. A multi-stage vacuum system for complex parts is included as a part of the HMI.

Starview's ASP & ASP/IR Series skin packaging machines can be equipped with an option film temperature sensor that over rides the PLC heat timer for consistent film heating. An optional automatic overhead out-feed system is offered. The PLC can be used to advance a customer furnished conveyor to remove finished skin packages from the work area.
