FAB SERIES FULLY AUTOMATIC ROTARY BLISTER SEALING MACHINES

FAB Series Automatic Rotary Blister Sealing Machines
Eight-station machine shown

- ★ Complete PLC machine control with color touch screen operator interface
- ★ Blister feeder, Card Feeder and Finished Package Unloader Standard
- ★ Smooth and reliable table operation with heavy-duty cam indexer and AC variable frequency drive
- ★ Excellent for high volume OEM's and contract packagers
- ★ Heavy-duty industrial design floor model machine

Description

Starview's FAB Series fully automated rotary type blister sealing machines are ideal for high volume or JIT production. Given the proper conditions these machines are capable of up to 24 cycles per minute in production. The FAB Series automated rotary blister sealing machines are built with the capability to feed blister(s), blister card(s) and discharge finished packages when proper tooling is installed. These machines may be used for conventional carded blisters, full face blisters and half-clamshell styles.

Starview's FAB Series may be equipped with an optional quick-change assembly to reduce changeover times when relieved face plates are utilized. One additional feeder may also be added to the machine to provide reduced labor content when the product is flat and can be fed from a conventional feeder magazine.
