

STARVIEW™

Hydraulic Press HP Series

Designed for versatility, the *HP Series Hydraulic Press* can be used for a multitude of cutting applications for various materials in diverse industries; however, these machines are specifically suited to be used in combination with skin packaging and thermoforming equipment.

The *HP Series* feature quick set-up and accurate positioning of die for precise trimming and longer life of the tooling. The hydraulic system, with adjustable pressure control, evenly distributes pressure over the entire cutting die. These machines are designed for efficient, uncomplicated production runs, and tooling changeover is completed only in a matter of minutes.

The *HP Series* machines are solidly engineered, yet simplistic in design, making them dependable for years of trouble-free performance and low maintenance.

Structure: Heavy gauge welded steel tube construction.

SPECIFICATIONS

Model	HP-1824	HP-2430	HP-2436
Maximum Cutting Area:	18" x 24"	24" x 30"	24" x 36"
Trim Press Tonnage:	60	80	100
Maximum Platen Stroke:	6" (adjustable)	6" (adjustable)	6" (adjustable)
Voltage:	208-230/3/60	208-230/3/60	208-230/3/60
Amperage:	25	25	30
Approximate footprint:	81" W x 49" D	97" W x 58" D	108" W x 58" D
Overall height:	80"	80"	80"
Working height:	37.5"	37.5"	37.5"
Approximate wt:	6,000 LB.	6,500 LB.	7,500 LB.

Cycle:

The operator places the skin board or formed sheet onto the feed station (the sheet is held by location stops) and presses the Cycle Start button. The feed station automatically moves in the trimming station and the safety system is automatically activated. Once the feed station reaches its accurate position, the press descends for trimming. The press then rises and the feed station returns automatically to the load/unload position. The operator unloads the scrap and cut parts. The process is repeated.

Custom Sizes and Features are Available on Request
