

STARVIEW™

MR SERIES MANUAL ROTARY BLISTER SEALING MACHINES

Standard MR2 manual rotary blister sealing machine with optional casters

- ★ **Economical for medium volume blister packaging and cellular manufacturing**
- ★ **Small footprint conserves floor space**
- ★ **Three standard sealing areas offered to accommodate a range of package sizes**
- ★ **Quick-change tooling for ease of changeover**
- ★ **Heavy-duty industrial design floor model machine**

Description

Starview's MR Series manual rotary type heat sealers are designed for low to medium volume production requirements where floor space is a consideration. These machines may be used for conventional carded blisters, full face blisters and half-clamshell styles as well as applications using Tyvek, foils and other heat sealable lidstock. The standard machines feature one sealing station with the second station used for load/unload.

Starview's MR Series manual rotary heat sealers are designed to include an optional cycle counter to keep track of the number of cycles sealed. Casters are offered that do not change the working height of the machine and make it easy to move from work cell to work cell.
