- ★ **Stainless steel wash down design**
- ★ **Heavy-duty industrial design floor model machine**

Description

Starview's **Olympus Series** machines are designed and competitively priced for "fresh counter" packaging, typically a clear or printed film to a preformed tray for food manufacturing companies, catering, grocery stores, delicatessens, etc. where it is desirable to provide a modified atmosphere in the package prior to sealing the Olympus Vac should be utilized. The Olympus Series is ideal for low to medium production. This series machines can adapt to seal for a wide range of product tray sizes by simply changing the tooling. The Olympus Series machines trim the film to the profile of the tray and automatically rewind the scrap web. The Olympus Series sealers will provide years of dependable performance with a minimum of maintenance.
